# Thinking Skills

## Thinking Skills

Discover the exciting new program which is fun and easy to use! These four learning activities will build accuracy, speed and confidence while monitoring student's progress as they begin to master important language skills!

These four programs include:

### Logical Statements

How many eyes does a minnow have? Well, a fish has two eyes and a minnow is a fish. Therefore, a minnow has two eyes! Students are challenged to expand their thinking skills as they provide the correct response to similar statements.

### Word Relationships

Father is to son as mother is to \_\_\_\_\_. The correct response is daughter! Students must study similar statements and fill in the correct response from the four provided.

### Word Magic

The restless tree sang in the wind! Does this statement represent a metaphor, simile, idiom

or personification? Students are encouraged to discover the magic of words as they study similar statements and provide the correct response.

### Cause and Effect

Eddie tripped on the sidewalk. Why did Eddie cry? Because, he tripped on the sidewalk! The concept of cause and effect is the focus of study as students are asked to provide the correct response to the questions. An important exercise!

#### Additional Features:

- Positive Reinforcement
- Score Keeping
- Entry and Exit at Any Level
- Option to Review

**V Logical Statements**

All reptiles have scales.  
A snake is a reptile.

The logical conclusion is:

1. A snake can crawl.
